Implementation of Objective One

Mission: Impossible ??

Implementation of Objective One

Mission: Impossible ??

- Convince TCSS to relax the social networking policies!

Implementation of Objective One

Mission: Impossible ??

- Convince TCSS to relax the social networking policies!

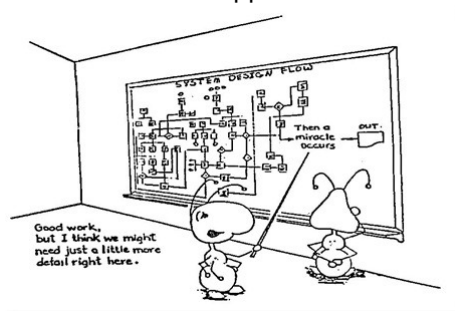

Okay, I have **zero** idea how to actually accomplish this one. Well, maybe a “miracle” could happen...

Implementation of Objective Two

Implementation of Objective Two

- Do you have a need to send mostly short informational messages?

Implementation of Objective Two

- Do you have a need to send mostly short informational messages?
- Do the receivers of your message rarely (if ever) need to reply?

Implementation of Objective Two

- Do you have a need to send mostly short informational messages?
- Do the receivers of your message rarely (if ever) need to reply?
- Do you want something that almost all mobile device users can access?

Implementation of Objective Two

- Do you have a need to send mostly short informational messages?
- Do the receivers of your message rarely (if ever) need to reply?
- Do you want something that almost all mobile device users can access?

You're wanting to have:

Implementation of Objective Two

- Do you have a need to send mostly short informational messages?
- Do the receivers of your message rarely (if ever) need to reply?
- Do you want something that almost all mobile device users can access?

You're wanting to have:

- Twitter!!!!

Implementation of Objective Two

- Do you have a need to send mostly short informational messages?
- Do the receivers of your message rarely (if ever) need to reply?
- Do you want something that almost all mobile device users can access?

You're wanting to have:

- Twitter!!!!

Twitter is an ideal solution for severe weather alerts, transportation delays, school closings, and similar notifications that require minimal interaction from message recipients.

Implementation of Objective Two (continued)

Implementation of Objective Two (continued)

- Do you have a group of people that need to collaborate?

Implementation of Objective Two (continued)

- Do you have a group of people that need to collaborate?
- Are the messages longer and/or with multimedia content?

Implementation of Objective Two (continued)

- Do you have a group of people that need to collaborate?
- Are the messages longer and/or with multimedia content?
- Do you want to prevent requiring participants to join a new group or download a new app?

Implementation of Objective Two (continued)

- Do you have a group of people that need to collaborate?
- Are the messages longer and/or with multimedia content?
- Do you want to prevent requiring participants to join a new group or download a new app?

You're wanting to have:

Implementation of Objective Two (continued)

- Do you have a group of people that need to collaborate?
- Are the messages longer and/or with multimedia content?
- Do you want to prevent requiring participants to join a new group or download a new app?

You're wanting to have:

- Facebook!!!!

Implementation of Objective Two (continued)

- Do you have a group of people that need to collaborate?
- Are the messages longer and/or with multimedia content?
- Do you want to prevent requiring participants to join a new group or download a new app?

You're wanting to have:

- Facebook!!!!

Facebook is a good solution for collaboration among colleagues (groups can be open or closed to the public, so the discussions can be kept mostly private if needed). Many people have a Facebook account, so in most cases, there's no need to sign up for anything new.

Project Monitoring and Evaluation

This part is easy.

Project Monitoring and Evaluation

This part is easy.

- Did TCSS relax policies?

Project Monitoring and Evaluation

This part is easy.

- Did TCSS relax policies?
- Are school and district personnel using social networking for notification and/or collaboration?

Project Monitoring and Evaluation

This part is easy.

- Did TCSS relax policies?
- Are school and district personnel using social networking for notification and/or collaboration?

If so, the project is successful. If not, we suffer the agony of defeat. Well, continued crippling of the internet. Close enough.
